

PK50, PK50 Flex

Hand Probes

The PK50 Hand Probe is an elegant, ergonomic and extremely robust hand probe replacing the original H50 and H51 hand probes. Available with rigid and flexible neck, the PK50 hand probe is intended for use on older models of Sensistor Hydrogen Leak Detectors (see compatibility below). Easy sensor change allows operators to replace the sensor in a matter of seconds thus minimizing maintenance cost and time. The ergonomically shaped grip also informs the operator about which direction the probe tip is pointing.

BENEFITS

- Simple sensor change in a matter of seconds
- Ergonomic handle with hand sensed direction of probe tip
- Improved robustness of the probe neck
- Replaces H50 Hand Probe and H51 Hand Probe with flexible neck

MODELS

- PK50 (rigid neck), P/N 590-930
- PK50 Flex (flexible neck), P/N 590-940

COMPATIBILITY

- H2000
- H2000 PLUS
- H1000
- ILS500

NB! does not fit Active Probe Holder. Please contact sales point for advice.
